Explore Japan with HIS

HIS offers a variety of services to better provide you with a convenient and safe travel and pre-travel experience.

Product development and distribution

We developed bus tours for tourists visiting Japan and proposed high-value-added trips through various product distribution channels.

We have also strengthened the dissemination of tourism and product information by utilizing SNS tailored to each country's market.

We received the "Best Service Award" at the "Supplier Awards 2024" from KKday, our product sales partner, because we have taken strict safety measures and earned high trust from our customers.

Fuji bus tour

Strengthening cooperation with local governments

We actively promoted promotional projects and joint product development with local governments working to welcome tourists visiting Japan.

In August 2023, we opened the "HIS Sunaba Country Visit Japan Rep Office" in Tottori Prefecture, with which we have concluded the "Inbound Tourism Promotion Agreement," to improve Tottori Prefecture's brand power overseas and strengthen overseas promotions.

Tottori Prefecture PR event at Singapore Travel Expo

Strengthening stores for travelers (tourist information centers)

We are dedicated to ensuring that every international visitor leaves with a smile. Our tourist information centers do more than just provide information; they are vibrant hubs where visitors can purchase unique local products from across Japan, participate in tourism promotions, and engage in events organized in partnership with local governments and businesses. These activities are part of our commitment to fostering sustainable communities and contributing positively to society.

Initiatives for the future of sustainable tourism

The Group aims to contribute to the development of a sustainable society by addressing social and environmental issues through its businesses with an awareness of coexistence, symbiosis, and mutual prosperity.

Initiatives to reduce environmental impact in business

Reducing exhaust gas during transportation ~ EV vehicles ~

THAILAND

In Thailand, we are promoting environmentally friendly transportation and sightseeing services, contributing to the sustainable development of our company and reducing greenhouse gas (GHG) emissions. We are working to achieve “net zero,” which means reducing emissions to virtually zero.

We are providing airport transfer and private sightseeing tour using EV vehicle in Bangkok.

We offer Chiang Mai City tour using an EV tuk-tuk.

VIETNAM

Ho Chi Minh City launched 70 environmentally friendly EV buggies to transport tourists around downtown. Each buggy can carry 7 passengers, with a maximum speed of 30km per hour for tours around the city. Safety is also highly concerned by installing door locks, seat belts, and safety bars. HIS offers several sightseeing activities using this EV buggies, which is open-air concept allowing the guest feel the city closer.

Travel Your Eco-Friendly Way – BYO Bottle campaign

AUSTRALIA

In Cairns, we launched a plastic bottle-free initiative, promoting eco-friendly alternatives to single-use plastics. As part of this effort, we installed water dispensers at 10 locations across Cairns, providing HIS customers with convenient access to refillable water options. These “Bring Your Own Bottle” measures reduce plastic waste, encourage sustainable travel habits, and support the preservation of the natural beauty of our destinations.

Member of Thailand’s Sustainable Tourism Initiative.

THAILAND

HIS Thailand is an official member of the Tourism Authority of Thailand’s (TAT) sustainability initiative, the Sustainable Tourism Acceleration Rating (STAR) project. Our participation reflects a strong commitment to enhancing sustainable tourism practices and supporting Thailand’s position as a leading sustainable destination, in alignment with the United Nations’ 17 Sustainable Development Goals (SDGs).

Co-creation with local communities

A journey to face social issues through interaction between people ~Study Tour~

CAMBODIA

HIS works on study tours in collaboration with NGOs, NPOs, and local governments, with the aim of promoting mutual understanding through exchange and working together to realize a sustainable society. In particular, we have been conducting study tours to interact with Cambodian children since 2010.

Cambodia was affected by the Pol Pot regime, and even today, it lacks educational personnel and school facilities, making it difficult to secure enough class time for each child, forcing them to teach in two shifts. Another major issue is the widening educational gap between urban and rural areas. In order to resolve this situation, in the spring of 2017, we collaborated with the NPO HERO to build a public elementary school where children can attend free of charge.

Since then, we have been involved in the construction of a total of five elementary schools, as well as playground equipment and libraries within the schools, and many customers from Japan have participated in these construction projects as tours. Even after the project is completed, we continue to conduct study tours to visit the school.

Through extracurricular classes, the tour not only provides an opportunity for Cambodian children to learn, but also provides an opportunity for tour participants to interact across borders and cultures. We will continue to promote mutual understanding among people around the world and propose sustainable travel that leads to world peace.

Support for Providing Disaster-Resistant Housing

FIJI

The Fiji corporation supports the Model Town Charitable Trust’s project, which supports the poor in Fiji, which has been hit hard by cyclones. This project provides disaster-resistant and sanitary housing for the poor, and carries out community development such as education, medical support, vocational training, and infrastructure development. At HIS, we give Koroipita Angels, handicrafts made by women in the community, to participants as a bonus gift for participating in the tour, and introduce them in the HIS tour pamphlet. We are working to raise awareness of this activity by providing “sustainable travel” where participation can lead to support.
